STANDARD PROCEDURE FOR SPANIEL FIELD TRIALS

1. The idea of a Spaniel Field Trial is to demonstrate the performance of a perfectly trained Spaniel in the Field. The performance of a Spaniel in Field Trials should not differ from that in any ordinary day's shooting, except that in the Trials a dog should do his work in a more nearly perfect way.
2. The function of a hunting Spaniel is to walk at heel (or on a leash) until bidden to seek game. When so ordered, he should seek game in a brisk, quiet manner thoroughly quartering the designated cover within gunshot in the line of quest without unnecessarily covering the ground twice. When game is flushed, dogs should drop or "hup" to flush or command and, if game is shot, should retrieve at command only, but not until the Judge has instructed the handler. Dogs should retrieve quickly and briskly when ordered to do so and deliver tenderly to hand. They should then drop or "hup" until given further orders. Spaniels which bark and give tongue while questing are objectionable and should be severely penalized.
3. If a dog, following the line of a bird or rabbit, is getting too far out he should be called off the line and later he should again be cast back on it. A dog which causes his handler and gun to run after him, while line running, is out of control. Handlers may control their dogs by hand, voice, or whistle, but only in the quiet manner that would be used in the field. Any loud shouting or whistling is evidence that the dog is hard to handle and, in addition, is disturbing to the game.
4. A dog should work to his handler and gun at all times. A dog which marks the fall of a bird, uses the wind, follows a strong runner which has been wounded, and will take direction from his handler is of great value.
5. When the Judge gives a line to a handler and dog to follow, this must be followed and the dog not allowed to interfere with the other contestant running parallel to him.
6. The Judges must judge their dogs for game finding ability, steadiness, and retrieving. In game finding the dog should cover all his ground on the beat, leaving no game in his territory and showing courage in facing cover. Dogs must drop to wing and shot and obey all

commands. When ordered to retrieve they should do this tenderly and with speed. No Trials for Spaniels can possibly be run without retrieving, as that is one of the main purposes for which a Spaniel is used.

7. In judging a Spaniel's work Judges should give attention to the following points, taking them as a whole throughout the entire performance rather than giving too much credit to a flashy bit of work.

Control at all time, and under all conditions.

Scenting ability and use of wind.

Manner of covering ground and briskness of questing.

Perseverance, and courage in facing cover.

Steadiness to flush, shot and command.

Aptitude in marking fall of game, and ability to find it.

Ability and willingness to take hand signals.

Promptness and style of retrieve and delivery.

Proof of tender mouth.

8. The Guns should shoot their game in a sportsmanlike manner, as they would in a day's shoot. The proper functioning of the Official Guns is of the utmost importance. The guns are supposed to represent the handler up to the time the game is shot, although not interfering in any manner with his work or that of the down brace. They are supposed if possible, unless otherwise directed, to kill cleanly and consistently, the game flushed by the Spaniels at a point most advantageous to a fair trial of their ability, with due regard to the dogs, handlers, judges, gallery and other contingencies.

9. Care should be taken not to shoot so that the game falls too close to the dog. If this is done it does not afford a chance for the dog to show any good retrieving ability and often results in a bird being destroyed. The guns should stand perfectly quiet after the shot, for otherwise they may interfere with the dog and handler. When a dog makes a retrieve no other birds or game should be shot unless ordered by the Judge for special reasons. The gun must also keep himself in the correct position to the handler and others.

10. It has been repeatedly proven that the most efficient gun and load for this work, in all fairness to the dogs, handlers and those responsible for the trial, is a well choaked twelve gauge double gun, and a load of not less than three drams of smokeless powder, and one and one-eighth ounces of number six chilled shot. It is earnestly requested that all guns will be guided thereby, for the good of the sport.
